Summary

Web developer with 5+ years of experience designing, developing, and deploying scalable web applications, specializing in Laravel and Vue.js. Skilled in building secure, high-performance solutions across projects ranging from small applications to large enterprise systems. Strong focus on staying current with industry best practices and solving complex technical challenges efficiently.

Experience

Full Stack Developer (Laravel & Vue.js)

Futuresoft Technology Pvt. Ltd. — Aug 2023 – Present

- Built and maintained news portals, travel booking platforms, and enterprise web applications with a focus on performance, scalability, and security.
- Developed responsive applications using Vue.js and Nuxt.js with reusable components, Server-Side Rendering (SSR), and SEO optimization.
- Designed and integrated RESTful APIs with Laravel and third-party services.
- Optimized application performance through database query optimization, Redis caching, and code refactoring.
- Implemented real-time features using WebSockets to enhance user experience.
- Managed Linux-based production servers on DigitalOcean, including deployment of Laravel projects with zero downtime using Deployer, Nginx configuration, SSL setup, Supervisor and PM2 process management and monitoring.

Laravel Developer

Ninja Infosys Pvt. Ltd. — May 2021 – July 2023

- Developed scalable & maintainable web applications
- Designed & built RESTful APIs using laravel & integrated them with vue js.
- Designed database structures, migrations, and optimized MySQL queries for better performance.
- Developed & implemented user authentication system for web applications using laravel, ensuring secure access & role-based permissions.
- Maintained and enhanced existing projects, ensuring their stability, performance, and security.
- Troubleshooting & debugging code issues.

Education

Banke Bageshwori Campus

Bsc. CSIT

Public Gyan Jyoti Higher Secondary School

Isc(+2 Science)

Skills

- Strong knowledge of PHP with OOP concept & latest Laravel framework.
- Proficient in frontend development using Vue.js, Nuxt.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, and jQuery.
- Experienced in designing and developing RESTful APIs, authentication systems, role-based access control, and third-party integrations.
- Extensive database experience with MySQL, PostgreSQL, and Redis, including query optimization and caching strategies.
- Skilled in Linux server administration and deploying applications on VPS environments, including Nginx configuration, SSL setup, Supervisor, PM2, and production monitoring.
- Experienced with real-time application development using WebSockets and background job processing using Laravel Queues.
- Familiar with testing and debugging using PHPUnit and Pest, with strong problem-solving skills for complex application issues.
- Proficient in version control and collaboration using Git and GitHub.
